SKILLS

JavaScript	Django
React.JS	Tailwind
HTML & CSS	RESTful APIs
Git & Github	SQL
Agile	Python

EDUCATION

Certified Full Stack
Certified React Developer

I Learn Code bootcamp

2019-2020

MBA / Project Management

Strayer University

2016-2019

Bachelor Degree in Economics

Ibn Zohr University

2011-2014

LANGUAGES

English

French

Arabic

PROFILE

Highly skilled Full Stack Developer with 6 years of experience in creating responsive web applications, I embrace new challenges with enthusiasm. Proficient in JavaScript, CSS, HTML, Python and various frameworks including React, Django and Tailwind. I bring a wealth of technical expertise to the table. Coupled with strong communication skills and a stellar work ethic, I am committed to delivering top-notch code.

WORK EXPERIENCE

Full Stack Developer

2022 - Present

Freelancer

- Developed and maintained backend components of a web application using Django, including models, views, templates, and RESTful APIs.
- Designed and implemented database schemas and migrations using Django ORM, ensuring efficient data storage and retrieval.
- Integrated third-party APIs and services into the Django application, such as payment gateways or geolocation services, to enhance functionality.
- Implemented user authentication and authorization mechanisms using Django's built-in authentication system
- Designed and developed frontend components using modern JavaScript frameworks like React, ensuring seamless integration with the Django backend.
- Implemented responsive web interfaces using HTML5, CSS3, and JavaScript, following best practices for accessibility and cross-browser compatibility.
- Utilized Django's built-in admin interface to manage application data and perform administrative tasks, customizing as needed to meet project requirements.
- Deployed and maintained the Django application on cloud platforms like AWS, configuring servers, databases, and other infrastructure components as needed.

Frontend Developer

2015 - 2022

Burke & Herbert Bank

- Led the frontend development efforts for the redesign of Burke & Herbert Bank's online banking platform, focusing on enhancing user experience and improving performance.
- Collaborated closely with UX/UI designers to implement design mockups and wireframes into functional frontend code, ensuring alignment with the bank's brand and usability standards.
- Developed responsive web interfaces using HTML5, CSS3, and JavaScript frameworks such as React, to optimize the platform for desktop and mobile devices.
- Integrated frontend components with backend systems and APIs, enabling seamless data exchange and real-time updates for account information and transactions.
- Implemented user authentication and authorization mechanisms, incorporating multi-factor authentication (MFA) and role-based access control (RBAC) to enhance security.
- Conducted thorough testing of frontend components, including unit testing, integration testing, and end-to-end testing, to ensure compatibility across browsers and devices.
- Worked closely with backend developers to troubleshoot and resolve frontend-backend integration issues, maintaining open communication and resolving issues promptly.
- Worked closely with senior developers to troubleshoot and debug frontend issues.
- Documented frontend architecture, codebase, and development processes, providing comprehensive documentation for future reference and onboarding of new team members.
